

Science Week

For Science week, we investigated what kind of tasters we are.

- We used blue food colouring to look at our tastebuds and count how many we had in one area.

These are our results:

Name	Number of fungiform papillae	What kind of taster are you? A) Non-taster B) Taster C) Supertaster
[Redacted]	6	b
[Redacted]	5	a
[Redacted]	6	b
[Redacted]	4	a
[Redacted]	10	b
[Redacted]	3	a
[Redacted]	8	b
[Redacted]	5	a
[Redacted]	6	b
[Redacted]	4	a
[Redacted]	4	a
[Redacted]	8	b
[Redacted]	7	b
[Redacted]	9	b
[Redacted]	8	b
[Redacted]	10	b
[Redacted]	2	a
[Redacted]	9	b
[Redacted]	9	b
[Redacted]	7	b
[Redacted]	11	c

What did we find out?

- Most people in our class are normal tasters because they have 6-10 taste buds in one part of our tongue.
